

EDT Hearing Room

TRIAL PREPARATION AND PRESENTATION FEATURES
TO HELP YOU MANAGE EXHIBITS, PREPARE WITNESS
AND EXPERT BRIEFS, CONSTRUCT CHRONOLOGIES,
AND ORGANIZE TRANSCRIPT, SUBMISSIONS AND
COURT DOCUMENTS.

Exhibit Management

- Auto-calculate the next exhibit number to be allocated to a tendered document as soon as it is admitted.
- Once validated by the hearing room operator the exhibit number is instantly stamped on the document image and displayed in the presentation viewer.
- Create a new exhibit from a sub-set of pages in a tendered document.
- Assign exhibit numbers to many documents at once.
- Rapidly classify exhibits on the fly during the hearing using purpose built fields.
- Automatically hyperlink exhibit numbers in transcript or other documents.

Presentation

- Present documents using a presentation viewer that has been designed to suit the dynamics of a courtroom and rapid display of evidence during fast paced litigation.
- Multiple documents can be viewed and compared simultaneously.
- Zoom, search, rotate, annotate, and highlight exhibits within the presentation viewer.

Chronologies

- Build timelines of key events.
- Link documents to events to build the story.
- Produce chronology reports linking PDF documents to sequentially organized events in spreadsheet or other formats.

Transcript

- Easily import pdf, text or MS Word transcript files.
- Classify, annotate and cross reference transcript files with exhibits, discovered documents and other artefacts.
- Automatically insert hyperlinks on exhibit numbers appearing in transcript documents.

Witness Briefs

- Collate all the documents relevant to a witness in a document set for ease of reference during pre-trial interviews or the hearing.
- Produce spreadsheet reports for witnesses with hyperlinks to pdf documents.
- Automatically hyperlink exhibit references within witness statements or transcripts using EDT's document hyperlinking feature.

Remote Access

- Using EDT's hosting capabilities, any documents can be accessible immediately via the Internet to those with permission to access them.
- Lawyers working remotely can virtually access the courtroom proceedings instantly from their offices.

Seamless Integration with Discovery Processes

- Collate all the documents relevant to a witness in a document set for ease of reference during pre-trial interviews or during the hearing.
- When EDT is used end-to-end there is a logical, efficient workflow from the discovery phase through into the trial preparation and presentation phases.
- No need to export documents from one system to another thereby reducing risk, cost, time and complexity.
- All documents relevant to the case are kept together in one place for ease of use and cross referencing.
- EDT delivers natural continuity and efficiency across the whole life cycle of your case.

Simple. Easy to Learn.
